The Company

Olympus Corporation is an international leader in precision technology, operating in industrial, medical, academic and consumer markets, specializing in optics, electronics, and precision engineering. The company's core product line-up offers clinical, educational, and research microscopes, nondestructive testing equipment, and analytical instruments all designed with the unwavering commitment to enhancing people's lives every day and contributing to the safety, security, quality, and productivity of society.

As a subsidiary of Olympus Corporation, Olympus Scientific Solutions Americas, based in Waltham, Massachusetts, USA is an integral part of the global Olympus network with specific responsibility for the sales and marketing of life science and industrial instrumentation in the Americas. Leading-edge testing technologies include ultrasound, ultrasound phased array, eddy current, eddy current array, microscopy, optical metrology, and X-ray fluorescence.

Scanners are usually not supplied with probes and wedges. For phased array probes and wedges, refer to the Phased Array Probes and Wedges catalog; for UT probes and wedges, refer to the Ultrasonic Transducers catalog.

Scanners and Accessories

The capacity to accurately position probes according to the surface being inspected greatly influences inspection quality. Depending on the application, constraints can arise that make probe positioning difficult. Olympus offers a wide range of industrial scanners and accessories to assist inspectors in their work while providing optimal data acquisition. Some of the applications covered by our scanner product line are: weld inspection, corrosion mapping, and aerospace. Supported technologies include: phased array, conventional ultrasonic, time-of-flight diffraction (TOFD), eddy current, and eddy current array. Scanner configurations include one or two encoded axes and manual or motorized options.

Scanner Encoder Connector Compatibility

Except when stated otherwise, scanners sold after July 2013 come standard with the LEMO connector compatible with the OmniScan MX2 and SX instruments. For use on a different instrument, an optional adaptor is required.

Required Encoder Cable Adaptor

Instrument	Scanner Connector	
	LEMO (From 07/2013)	DE15 (Prior to 07/2013)
OmniScan MX	Omni-A-ADP27 [U8780329]	N.A.
TomoScan FOCUS LT	C1-LF-BXM-0.3M [U8769010]	C1-DE15F-BXM-0.30M [U8767107]
OmniScan MX2 OmniScan SX FOCUS PX	N.A.	Omni-A2-ADP20 [U8775201]

Manual One-Axis Scanner

VersaMOUSE – Manual One-Line Indexer Scanner

The VersaMOUSE™ is a scanner designed for linear encoded scans with a phased array probe. The integrated indexing button makes it ideal for 2-D mapping applications such as CFRP flat panel and corrosion inspections. The VersaMOUSE can perform an encoded one-line scan followed by indexing of the position in the perpendicular direction. Another one-line scan can then be performed and juxtaposed to the previous scan. This process is repeated to produce a complete 2-D map of the area of interest.

The exclusive adjustable yoke of the VersaMOUSE is easy to set up on an IHC-type wedge using standard attachment holes. The spring-loaded system is optimized to offer the lowest clearance possible. The yoke is attached to the scanner using a quick-connect system, which keeps the probe either parallel or at a 90° skew to the scan axis.

The encoder wheels are specially designed to resist slippage on wet surfaces. The rugged construction makes this scanner an affordable, reliable solution for all phased array inspections performed with a single probe. For even better stability on ferromagnetic surfaces, an optional magnetic wheel package is available.

Specifications

Probe-Holder Position	Length in Scan Axis (mm)	Width (mm)	Height (mm)	Weight (kg)
Front	170	80	42	0.4
Side	80	152	42	0.4

An easily clipped and spring-loaded yoke that can be positioned with a 90° skew.

Features

- Encoded linear scan (one axis) for phased array inspection.
- Integrated clicker button for indexing enabling 2-D mapping.
- Adjustable fork for easy and fast installation of multiple wedge dimensions.
- Two rubber wheels that remain in contact with the surface for maximum adherence.
- An easily clipped and spring-loaded yoke that can be positioned with a 90° skew.
- Encoder resolution: 8.4 steps/mm.
- Durable aluminum body and waterproof construction.

Standard Inclusions

- 2.5 m encoder cable.
- One adjustable PA yoke (width: 65 mm, length: 65 mm).
- Carrying case.

Note: Probes and wedges are not included with the scanner.

Options

Magnetic Wheels package

Optional magnetic wheels provide maximum adherence and improved stability on ferromagnetic surfaces.

P/N: VersaMOUSE-A-MagWheel [U8775247]

VersaMOUSE scanner and RexoFORM for corrosion inspection.

Mini-Wheel – Small Footprint Encoder

The Mini-Wheel™ encoder is used for the positioning and dimensioning of defects in the scan axis and can synchronize data acquisition with probe movement. Typical applications are: laboratory testing, training, and manual inspection data sampling*.

The Mini-Wheel encoder is waterproof and compatible with the HST-X04 scanner. Mount standard Olympus wedges using the included bracket kit. This miniature encoder is made entirely of stainless steel and features sealed bearings for long-lasting smooth operation. The custom electronic circuit was designed to prevent noise induction in UT signals.

Ordering Information

Part Number	Item Number	Connector	Compatibility
ENC1-2.5-LM	U8775295	LEMO	OmniScan MX2 and SX
ENC1-2.5-DE	U8780197	DE-15	OmniScan MX
ENC1-2.5-BX	U8780196	Bendix	TomoScan Focus LT

The cable length suggested in the table is 2.5 m. Other lengths are available.

HST-X04 – TOFD Weld Inspection

Part Number	Item Number	Description
HST-X04	U8750007	Package includes: Mini-Wheel Encoder 2x 10 MHz, 3 mm TOFD probes 2x 5 MHz, 6 mm TOFD probes 2x ST1-45L-IHS 2x ST1-60L-IHS 2x ST1-70L-IHS 2x 5 m LEMO 00 to Microdot UT cables 2x LEMO 00 to BNC adaptors
HST-X04-SCN	U8779098	Scanner and Mini-Wheel encoder only (no probes, wedges, or cables)
HST-X04-PA	U8775137	Scanner holds 40 mm wide phased array wedges and a Mini-Wheel encoder (no probes, wedges, or cables).

Features

- Waterproof (IP68).
- Stainless steel construction.
- Encoder resolution of 12 steps/mm.
- Removable encoder wheel.
- Overmold rubber wheel for better grip.
- Sealed bearing for long-lasting smooth wheel rotation.
- Spring-loaded attachment system.
- Threaded holes for alternative mounting

Standard Inclusions

- One encoder with standard rubber wheel.
- One mounting bracket kit and tools.

Options

Magnetic Wheel

Use the optional magnetic wheels for maximum adherence to ferromagnetic surfaces. The first P/N is compatible with the O-ring tire encoder and the V2 is for the overmold tire encoder.

P/N: ENC1-A-MagWheel [U8902964]
ENC1-A-MagWheel-V2 [U8775290]

Mounting Bracket Kit

The extra mounting bracket kit is used to mount the Mini-Wheel encoder on a wedge.

P/N: ENC1-BRACK [U8775120]

A = 27 mm

B = 31 mm

C = 24.5 mm

D = 24.2 mm

E = 18 mm

F = 6.1 mm

*For high-rate inspection, use of a scanner with heavy-duty encoding devices is recommended.

The HST-X04™ TOFD manual scanner offers an efficient, low-cost weld inspection solution.

HST-Lite – TOFD Weld Inspection

The new HST-Lite scanner is the perfect choice for cost-effective, one-channel TOFD inspections when signal quality is important. The combination of magnetic wheels and spring-loaded probe holders offer the stability required to perform high-quality, one-line inspections. The scanner can be operated using only one hand and will attach to ferromagnetic surfaces even when in an upside-down position.

The scanner's position can be encoded on flat surfaces or around the circumference of pipes as small as 4.5 in. (114.3 mm) OD. Adjustment of the scanner components can be performed without tools.

Ordering Information

Part Number	Item Number	Description
HST-Lite	U8750061	Scanner (see standard inclusions).
HST-Lite-kit01	U8750062	Package includes: Scanner 2x 10 MHz, 3 mm TOFD probes 2x 5 MHz, 6 mm TOFD probes 2x ST1-45L-IHS 2x ST1-60L-IHS 2x ST1-70L-IHS 2x 5 m LEMO 00 to Microdot UT cables 2x LEMO 00 to BNC adaptors

Features

- Circumferential scans performed with two TOFD probes on pipes 4.5 in. (114.3 mm) OD or greater.
- Four magnetic wheels firmly attach the unit to ferromagnetic inspection surfaces.
- Light aluminum frame.
- Independently positioned and spring-loaded probe holders.
- Waterproof, spring-loaded encoder with 9 step/mm resolution.
- Removable handle for lower profile.
- Attachment devices for umbilical cables.
- The frame design enables probes to be positioned outside the wheels (2 additional magnetic wheels are required).
- Engraved references on the scanner and pointer on the probe holders ensure easy probe separation measurement.

Standard Inclusions

- Scanner frame with handle.
- Four magnetic wheels.
- Waterproof, spring-loaded wheel encoder with 5 m cable.
- Two spring-loaded arms (SLA) with TOFD-P/E yokes (31.75 mm wide with 5 mm diameter buttons).
- Irrigation tubing and accessories.
- Cable conduit.
- Carrying case.

Note: Probes and wedges are not included with the scanner.

COBRA – Weld Inspection of Small-Diameter Pipes

The COBRA™ manual scanner, combined with the OmniScan® phased array flaw detector, is used to perform circumferential weld inspections on small-diameter pipes. The COBRA holds up to two PA probes for inspections on pipes with outside diameters ranging from 0.84 in. (21 mm) to 4.5 in. (114 mm)

With its very slim design, this manual scanner inspects pipes in limited access areas where minimal clearance is required. Adjacent obstructions, such as piping, supports, and structures, can be as close as 12 mm (0.5 in.). This spring-loaded scanner is designed to clasp carbon steel and stainless steel pipes of various diameters using multiple links. This unique feature enables the scanner to be installed and operated from one side of a row of pipes. The COBRA scanner is characterized by its smooth-rolling encoded movement, which enables accurate data acquisition. The scanner holds up to two phased array probes for complete inspection of the weld in one pass. For pipe-to-component inspections, the scanner can be configured quickly to perform one-sided inspections using a single probe.

This Olympus solution uses low-profile phased array probes with optimized elevation focusing, enhancing detection of small defects in thin-wall pipes. Specially designed low-profile wedges fitting each pipe diameter covered by the scanner are available for a complete solution.

The COBRA scanner ensures stable, constant, and strong pressure, thus providing good UT signals and precise encoding around the full circumference of the pipe.

Features

- Covers standard pipes from 0.84 in. to 4.5 in. OD (21 mm to 114 mm).
- Operates within 12 mm (0.5 in.) clearance (on all standard pipes), permitting inspections in limited access areas.
- Holds up to two phased array probes for complete weld coverage in one pass.
- Easy installation and manipulation from one side of a row of pipes.
- Can be configured to perform one-sided inspections for pipe-to-component evaluations.
- The included mechanical setup templates eliminate the need for pipe samples when preparing the scanner for standard pipes.
- The design provides stable and constant pressure around the full circumference of the pipe.
- Urethane wheels provide smooth radial movement and limited axial drift.
- Encoder resolution of 32 steps/mm.
- Compact, lightweight, and portable.
- Wedges and probes can be changed quickly and easily.
- The distance between probes can be adjusted from 0 mm to 55 mm.
- The spring-loaded scanner can be used on ferromagnetic and nonferromagnetic pipes.
- Waterproof and rust free.

The COBRA scanner on a 0.84 in. pipe with two A15 PA probes with an OmniScan MX2 16:64 displaying two PA groups with sectorial scans and C-scans.

Probes

Part Number	Item Number	Freq. (MHz)	Number of Elements	Pitch (mm)	Elevation (mm)	Elevation Curvature Radius (mm)
2.25CCEV35-A15C-P-2.5-OM*	U8331117	2.5	16	0.5	10	35
3.5CCEV35-A15C-P-2.5-OM*	U8331149	3.5	16	0.5	10	35
5CCEV35-A15-P-2.5-OM	U8331163	5.0	16	0.5	10	35
7.5CCEV35-A15-P-2.5-OM	U8330826	7.5	16	0.5	10	35
10CCEV35-A15-P-2.5-OM	U8331014	10.0	32	0.3	7	35

These probes come standard with an OmniScan® connector and a 2.5 m (8.2 ft) cable.

* A15C casing are based on the same design as the A15 but are 2 mm taller, increasing height clearance.

Wedges

Specially designed SA15 low-profile wedges are available with the different axial outside diameters (AOD) as specified in the table below. These wedges have been optimized to position the A15 probe as close as possible to the weld in order to reduce the number of skips required and as low as possible for maximum height clearance. This is accomplished with no acoustic compromises. These wedges are fitted with irrigation ports and holes for scanner mounting and can be configured to generate 60° shear (N60S) or longitudinal (N60L) waves in steel. Wedges for TOFD inspection are also available (use 3 mm diameter element ST1 probes) with the following refracted angles in steel: 60L, 70L, and 80L.

Note: height clearance required for longitudinal wave inspection is 25 mm with SA15 and 35 mm with ST1 and right angle cable connector.

Standard Wedge AOD values and Pipe OD

AOD (in.)	Minimum OD (in.)	Maximum OD (in.)
0.84	0.800	0.840
1.05	0.840	1.050
1.315	1.050	1.315
1.66	1.315	1.660
1.9	1.660	1.900
2.375	1.900	2.375
2.875	2.375	2.875
3.5	2.875	3.500
4.0	3.500	4.000
4.5	4.000	4.500

The solution uses low-profile phased array probes with optimized elevation focusing, which improves the detection of small defects in thin-wall pipes.

Wedges for TOFD inspection are also available.

The COBRA scanner can also be configured for pipe-to-component weld inspections.

Ordering Information

HSMT-Compact – Weld Inspection

The HSMT-Compact™ is a manual one-axis encoded scanner designed for maintenance weld inspection. It is particularly small, light, and versatile and can be used with up to four probes on plates as well as for circumferential scans on pipes as small as 4.5 in. (114.3 mm) OD. The scanner width can be adjusted and the frame can be extended outside the limit of the wheels to provide a configuration that is suitable for hard-to-reach places, such as pipe-to-component welds.

This configuration is suitable for hard-to-reach places such as pipe-to-component welds.

See the accessories section on page 30.

Replacement Encoder

P/N: ACIX895 [U8775097]

Spare Parts Kit

P/N: OPTX689 [U8775021]

Features

- Enables circumferential scan using up to four probes (UT or PA) on 4.5 in. (114.3 mm) OD pipes, or greater.
- Four plastic-covered magnetic wheels hold the unit against a ferromagnetic inspection surface.
- Light aluminum frame with customizable width.
- The frame design enables probes to be positioned outside the wheels.
- Independently positioned and spring-loaded probe holders.
- Waterproof, spring-loaded encoder with a 12 steps/mm resolution.
- Removable handles for lower profile.
- Attachment devices for umbilical cables.
- An integrated water manifold that simplifies couplant distribution.
- Metric/US Customary unit rulers on the scanner for easy probe separation measurement.

Standard Inclusions

- Scanner frame with handles, and:
 - 250 mm (10 in.) frame bar
 - 450 mm (18 in.) frame bar
 - 650 mm (26 in.) frame bar
- Four plastic-covered magnetic wheels.
- Waterproof, spring-loaded wheel encoder with a 5 m cable.
- Four 90° probe holder brackets.
- Four spring-loaded arms (SLA).
- Four TOFD-P/E 31.75 mm yokes.
- Two PA 40 mm × 38 mm yokes.
- Two 55 mm yoke arm pairs
- Irrigation tubing and accessories.
- Cable conduit attachment fixture.
- Carrying case.

Note: the umbilical cable, probes, and wedges are not included with the scanner.

Specifications

Length in Scan Axis (mm)	Width (mm)	Height (mm)	Weight (kg)
152	94 + bar length	102	3.2

HSMT-Flex – Weld Inspection

The HSMT-Flex™ is intended for one-axis encoded inspection of circumference welds on pipes of 4.5 in. (114.3 mm) OD and greater. The scanner comes equipped with four probe holders, but can be mounted with a total of eight probes with optional probe holders. Mounted probes can be either phased array or conventional UT to provide the most efficient inspection results.

The major characteristic of the scanner is its ability to bend in the center. This feature enables the scanner to fit on smaller pipes and also brings the force of the spring-loaded arm in the radial direction of the pipes for better stability of the wedge and optimum data acquisition. Optional pivoting probe

holders can also be installed on the outside of the scanner.

The HSMT-Flex also has one slidable side frame. This feature enables probes to be mounted on the outside of the scanner, providing a configuration that is suitable for hard-to-reach places such as pipe-to-component welds.

Options

Umbilical

See the accessories section on page 26.

Remote Pulser/Preamplifier

See the accessories section on page 24.

Couplant-Feed Units

See the accessories section on page 29.

Laser Guide Kit

Battery-operated laser guiding device for easier weld tracking.

See the accessories section on page 30.

Replacement Encoder

P/N: ADIX1255 [U8775096]

Probe Holder Kits

Set of two spring-loaded arms (SLA) mounted on 90° brackets to accommodate more than four probes.

Standard: for pipes larger than 12 in. OD.

P/N: OPTX666 [U8775011]

Pivoting: for pipes smaller than 12 in. OD.

P/N: OPTX0717 [U8775095]

Spare Parts Kits

For UT+TOFD applications

P/N: OPTX686 [U8775020]

For PA+TOFD applications

P/N: OPTX690 [U8775022]

Features

- A folding aluminum frame to optimize probe contact on pipes for circumferential weld inspection.
- Four plastic-covered magnetic wheels which hold the unit against a ferromagnetic inspection surface.
- Compact and versatile; the provided frame bars offer size customization.
- Supports up to four conventional UT or phased array probes on pipes.
- Supports up to eight conventional UT or phased array probes on pipes bigger than 12 in. OD using the optional standard probe holder kit and on pipes ranging from 4.5 in. to 12 in. OD using the optional pivoting probe holder kit.
- Independently positioned, spring-loaded probe holders.
- One waterproof, spring-loaded encoder with a 12 steps/mm resolution.
- Removable handles for a lower profile.
- An eyelet for umbilical attachment.
- An integrated water manifold simplifies couplant distribution.
- Metric/US Customary unit rulers on the scanner frame for easy probe separation measurement.

Standard Inclusions

- Scanner frame with handles and:
 - Two 340 mm (13.5 in.) frame bars
 - Two 500 mm (20 in.) frame bars
- Four plastic-covered magnetic wheels.
- One waterproof, spring-loaded wheel encoder with 5 m cable.
- Four 90° probe holder brackets.
- Four spring-loaded arms (SLA).
- Four TOFD-P/E 31.75 mm yokes.
- Two PA 40 mm × 38 mm yokes.
- Two 55 mm yoke arm pairs
- Irrigation tubing and accessories.

Note: the umbilical cable, probes, and wedges are not included with the scanner.

Specifications

Length in Scan Axis (mm)	Width (mm)	Height (mm)	Weight (kg)
263	466	147	4.4

The hinged design of the HSMT-Flex scanner makes it possible to inspect pipes as small as 4.5 in. OD.

RollerFORM – Phased Array Wheel Probe

Features

- Exceptional coupling, requiring minimal couplant.
- Acoustic impedance similar to water.
- 25 mm water delay line enables inspection of composites up to 50 mm thick.
- Up to 51.2 mm wide beam coverage.
- Can be used in accordance with existing aircraft manufacturer procedures.

Standard Inclusions

- Phased array probe with OmniScan connector.
- Waterproof encoder with OmniScan MX2 or SX compatible connector.
- Laser guide.
- Indexer and Start Acquisition buttons.
- Spare parts.
- Filling/spraying pump and tubing.

Olympus' RollerFORM™ phased array wheel probe is designed to address the inspection of composites and other smooth-surfaced materials commonly used by the aerospace industry. An affordable and easy-to-implement replacement for full 2-D encoding systems, the RollerFORM also offers a viable alternative to immersion techniques.

The unique tire material of the RollerFORM has been specifically developed to guarantee high-quality, immersion-like ultrasonic testing. Minimal couplant and pressure are required for the RollerFORM to provide excellent coupling and a strong signal, even in difficult scanning positions.

Just Roll It for Instant Results

The RollerFORM, combined with a phased array instrument such as an OmniScan® or a FOCUS, uses zero-degree ultrasonic beams for manufacturing and maintenance inspections. Common applications include delamination sizing and porosity quantification in composite core material, as well as wall-loss monitoring in aluminum panels. With its integrated indexing button, the ergonomically designed RollerFORM enables you to map the surface of an inspected material by acquiring multiple one-line C-scans and combining them in real time into a single image. The built-in laser guide facilitates straight and precise one-line scans.

In addition to providing exceptional coupling, the tire of the RollerFORM wheel is made of a unique material that closely matches the acoustic impedance of water. This design feature permits the efficient transmission of energy to the part without unwanted echoes, obtaining an optimum 1 mm near-surface resolution in composites when using the 5 MHz phased array probe model. The 3.5 MHz phased array probe model is better suited for certain thicker, more attenuating materials. Since the tire is transparent, you can easily identify the presence of air bubbles or contaminants within the water chamber.

Specifications

Description	Value
Typical Near Surface Resolution (3 x 3 mm delamination)	1 mm at 5 MHz 1.5 mm at 3.5 MHz
Position of Repeat Interface Echo (in composite)	50 mm
Minimum Surface Curvature (convex radius)	50 mm
Dimensions (L x W x H)	235 x 145 x 150 mm
Weight (without water)	1.5 kg

HydroFORM/RexoFORM – Corrosion Mapping

The HydroFORM and RexoFORM are designed to offer the best inspection solution for the detection of wall-thickness reductions due to corrosion, abrasion, and erosion. Our solution also detects mid-wall damage such as hydrogen-induced blistering or manufacturing-induced laminations and easily differentiates these anomalies from loss of wall thickness.

The unique quick adjustment device offered by both scanners enables the wedge/probe assembly to be positioned to any curvature greater than 4 in. OD (101 mm).

Specification Comparison

	HydroFORM	RexoFORM
Phased array probe	I4	A12, A14
Maximum one-line scan coverage (width)	60 mm	38 mm (A12), 60 mm (A14)
Delay line medium	Water	Rexolite
Delay line height	14 mm or 24 mm	20 mm
Position of repeat interface echo (in steel)	125 mm	50 mm
Typical near-surface resolution ($\frac{1}{8}$ in. FBH)	1.5 mm	2 mm
Depth resolution	0.1 mm	0.1 mm
OD inspection range	4 in. and greater	4 in. and greater
ID inspection range	10 in. and greater	N/A
Contact device	Wheels	Carbides
Footprint	110 mm x 130 mm	40 mm x 95 mm
Scan direction	Circumferential	Circumferential
Scan speed (1 mm x 1 mm resolution)	100 mm/s	100 mm/s
Scanner compatibility	ChainSCANNER	ChainSCANNER, GLIDER, and VersaMOUSE

Features

- The first commercially-available, semi-automated phased array product for corrosion mapping applications.
 - Reduced probe raster movement increases safety for operators and improves mechanical reliability.
- The patent-pending quick radius adjustment allows for the inspection of different curvatures. No wedges are needed.
 - Convex surface: 4 in. OD, up to flat.
 - Concave surface: 10 in. ID, up to flat (HydroFORM).
- HydroFORM and RexoFORM can be attached to automated or semi-automated scanners and used independently as manual scanners.
 - Cost-effective.
 - Minimal tools required for normal operation.

Standard Inclusions

The HydroFORM manual corrosion mapping scanner kit includes:

P/N: HYDROFORM-K-MANUAL [U8775182]

- One probe holder with a water delay line.
- One carriage with four magnetic wheels.
- One phased array probe. (7.5L64-I4-P-7.5-OM)
- 100 foam gaskets.
- One application-specific Mini-Wheel encoder.
- One 7.5 m encoder cable extension.
- Irrigation tubing and accessories.

The RexoFORM manual corrosion mapping scanner includes:

P/N: REXOFORM [U8775241]

- One probe holder with a Rexolite delay line.

A patent-pending quick radius adjustment enables inspection of different curvatures without the need for wedges. The HydroFORM also has an integrated encoder, which is required for manual inspections.

HydroFORM

High-performance corrosion mapping for rough and uneven surfaces

HydroFORM utilizes an innovative water column concept that eliminates the need for a wedge, thus providing the benefits of a phased array immersion tank inspection. Easy gate synchronization with the front wall enables accurate backwall corrosion monitoring and remaining wall thickness measurements. This concept, which uses a low-flow water supply and consumable gaskets, offers excellent surface conformance and optimized coupling conditions, even on rough surfaces.

XY mapping principle on pipes with the HydroFORM and ChainSCANNER.

RexoFORM

Quick and easy corrosion mapping for smooth surfaces and limited-access areas

The RexoFORM is a versatile wedge for phased array zero degree and angle beam inspection with the Rexolite delay line. With its unique design, the RexoFORM can be used on pipes of different diameters without the need for multiple curved wedges. The RexoFORM is also compatible with the A12 and A14 probes you may already have, making it an affordable solution.

Example of beam possibilities with the RexoFORM and A14 probe.

REXOFORM-SP-WEDGE	U8775242	Spare Rexolite delay line and gasket for RexoFORM.	

Motorized One-Axis Scanner

WeldROVER – Weld Inspection

The WeldROVER™ is a perfect addition to the Olympus family of scanners for those customers who require a more stable inspection than that provided by manual scanners and within a more economical package than that of the high-production zone-discrimination systems typically used in offshore pipeline construction.

The WeldROVER is a simple, industrial-strength, one-axis encoded scanner that provides the customer with fully mechanized automated data acquisition. It is designed to perform fast and efficient phased array inspections on ferromagnetic piping or vessel girth welds and long seams with minimum training and setup time. The scanner can be configured with up to six probes for phased array, TOFD, and conventional UT inspection.

¹ Interface with TomoScan FOCUS LT™ can be achieved using the optional encoder cable adaptor.

Configurations

A typical configuration for compliance with ASME codes is two PA probes and one or two pairs of TOFD probes.

Circumferential scan

- Supports two probes at the back and two probes at the front of the scanner on pipes from 4 in. OD and greater.
- Supports up to four probes at the front of the scanner on pipes from 12 in. OD and greater.

The WeldROVER is incredibly easy to use. It is operated by a simple two-button remote control with variable speeds. The scanner interfaces with the OmniScan® or FOCUS instruments directly without the need for complex software, motion controller electronics, or configuration. The laser guide indicator helps the operator manually adjust the scanner direction using the steering lever. This allows precision data to be acquired without the need for guide bands, complex tracking systems, or motorized steering capability. It is a perfect fit for companies offering fully mechanized, automated phased array (AUT) inspection services, and requires less than one hour of training for those customers who have completed the basic OmniScan course.

- Supports up to six probes at the front of the scanner on pipes from 16 in. OD and greater.

Longitudinal scan

- Supports up to six probes at the front of the scanner on pipes from 30 in. OD and greater.

Note that on smaller pipes, the probe separation distance will be limited.

Features

- Can support up to six probes for TOFD, phased array, or pulse-echo inspections.
- Constant scanning speed control for smooth data acquisition at any speed.
- Compact motion controller offering 10 different scan speeds from 5 mm/s to 50 mm/s.
- Simple two-button remote control for jog or constant encoded motion in either the backwards or forward direction.
- Performs data acquisition using the OmniScan or FOCUS¹ instruments with less than five minutes configuration time.
- The four industrial-strength magnetic wheels are driven for use on ferromagnetic surfaces.
- Integrated water manifold for simple and efficient couplant delivery.
- Emergency-stop button located on the scanner.
- A laser guide indicator to help the operator follow the weld centerline, or any other inspection reference.
- Room to integrate a remote pulser/preamplifier for improved TOFD-P/E inspections.
- Divisible cable conduit umbilical offers cable protection and configuration flexibility. Minimal time needed for probe reconfiguration.
- Waterproof (IP65).

Supports two probes at the back and two probes at the front of the scanner on pipes from 4 in. OD and greater.

Standard Inclusions

- One motorized scanner with rotating probe-holder arms at the front and back of the scanner.
- Two probe holder frame bars of 200 mm (8 in.) and one of 430 mm (17 in.)
- Remote control with a 5 m cable.
- MCDC-01: one-axis DC motion controller.
- Power supply.
- Encoder cables linking the MCDC-01 to the OmniScan® MX2 or SX.
- Six spring-loaded arms (SLA), pivoting probe holders, and all the brackets needed for the different configurations.
- Four TOFD-P/E 31.75 mm yokes.
- Two PA 40 mm x 55 mm yokes.
- Two PA 40 mm x 65 mm yokes for PWZ1 and A14 probes.
- Two PA 40 mm x 46 mm yokes.
- Laser guide and holder.
- Two steering levers.
- One 5 m divisible conduit for cable protection and attachment to the scanner.

- Irrigation tubing and fittings.
- Scanner and accessory carrying case.

Note: All cables for scanner operation are 5 m. Probes and wedges are not included with the scanner. The WeldROVER can also be optionally delivered with 10 m cables.

Options

Couplant-Feed Units

Remote Pulsar/Preamplifier

See the accessories section on page 24.

Extra Spring-Loaded Probe Holder

P/N: WELDROVER-A-SLA [U8775125]

Extra Laser Guide

P/N: WELDROVER-A-LASER [U8775124]

Instrument case

Modular instrument and accessory hard carrying case. The modules can be used to transform the scanner case into a workstation.

P/N: WELDROVER-A-ICASE [U8775123]

Yokes

See the accessories section on page 30.

Spare Parts Kit

Basic spare part kit for the WeldROVER Scanner.

P/N: WeldROVER-A-SPKit [U8775122]

P/N: WeldROVER-A-SPKit-10M [U8775149]

Data acquisition can be handled completely by the OmniScan MX2 (not included in WeldROVER package)

Specifications

Scanner speed: 5 mm to 50 mm per second

Encoder resolution: 2100 steps/mm (typical)

Power consumption: 90 W

Maximum input current: 4 A

Voltage: 24 VDC

Power supply input voltage:
100 VAC to 240 VAC; autoswitching

Component	Length (mm)	Width (mm)	Height (mm)	Weight (kg)
Scanner with long bar and six probes	430	380	175	12.0
Scanner with small bars and four probes	380	200	175	11.0
MCDC-01 motion controller	175	110	60	1.5
Power supply	200	85	50	1.0
Remote control	230	50	90	0.8

Motorized Two-Axis Scanner

MapROVER – Corrosion Mapping

The MapROVER is a new addition to Olympus scanner product line. Thanks to its two motorized axes, the MapROVER improves productivity to the Olympus corrosion inspection solution. Control is easily performed with the use of a touch screen remote control, which eliminates the need for a computer or complex motor-controller programming. When combined with the HydroFORM phased array corrosion mapping solution, the MapROVER is a very powerful tool for C-scan imaging of remaining wall thickness and mid-wall anomalies. When used with the OmniScan SX UT for conventional dual UT inspection, the MapROVER represents a cost-effective and simple option over the more complex systems currently available on the market.

Ordering information

Part number	Item Number	Description
MapROVER	Q7500003	MapROVER scanner kit with 7.5 m long cable
MapROVER-30m	Q7800017	MapROVER scanner kit with 30 m long cable
HydroFORM-K-AUT	Q7750068	7.5 m HydroFORM with PA probe, buggy and encoder
HydroFORM-K-AUT-30m	Q7800018	30 m HydroFORM kit with PA probe, buggy and encoder
D790-SM	U8450009	Dual UT probe D790-SM
ABWX612	U8700372	Economical fixture for D790 dual UT probe
MapROVER-A-D790-ProbeHolder	Q7750070	Rugged fixture for D790 dual UT probe
C174-LM-UDOT-7.5M	Q7670010	7.5 m UT cable (Lemo-00 to Udot)
C174-LM-UDOT-30M	Q7670011	30 m UT cable (Lemo-00 to Udot)
MapROVER-A-weldkit-2probes	Q7750082	Weld probe holder kit for 2 probes with PA and TOFD arms
MapROVER-A-weldkit-4probes	Q7750083	Weld probe holder kit for 4 probes with 2 PA + 2 TOFD probe holders

Features

- Four magnetic wheels that are motorized for constant data acquisition up to 147 mm/s.
- Motorized raster arm enabling 600 mm scan width travelling at a speed up to 900 mm/s.
- Touch screen remote control with two joysticks allowing performing jog or constant encoded motion as well as two different choice of complete automatic raster scan patterns.
- Performs data acquisition using the OmniScan or FOCUS instruments with less than five minutes configuration time.
- Cable management system for increased reliability.
- Emergency-stop button located on the scanner and on the power supply.
- Divisible cable conduit umbilical offers cable protection and configuration flexibility.
- Handle for scanner manipulation and umbilical attachment.

Standard Inclusions

- Non-steerable motorized scanner.
- Motorized raster arm 600 mm long.
- Spring loaded probe holder compatible with HydroFORM.
- Spring loaded probe holder compatible with D790 dual UT probe (probe fixture sold separately).
- One skew arm to assist scanner direction.
- Power supply.
- Detachable umbilical cables with divisible protection sleeve.
- Encoder cable linking to OmniScan MX2 or SX.
- Touch screen remote control.
- Carrying case.

The MapROVER is also capable of inspection using dual element conventional UT probes. When combined with the OmniScan SX UT instrument, this alternative solution is quite affordable.

Configurations

The standard MapROVER application is for corrosion mapping. For greater versatility, the MapROVER can also be fitted with an optional probe holder kit for weld inspection.

Corrosion mapping

- A motorized raster arm comes standard for a 600 mm wide travel distance.
- Standard probe holder compatible with HydroFORM or D790 dual conventional UT probe when using optional probe fixture and cables.

Weld inspection

- An optional probe holder kit can be mounted on the scanner for one line scan.
- Only the kit for 2 probes can be mounted on the raster arm.

OmniScan acquisition unit

Motorized scanner with 4 magnetic wheels

Power supply

Touch screen remote control

HydroFORM and holder assembly

Motorized raster arm

Specifications

Maximum Scanner speed: 142 mm/s

Maximum raster arm speed: 900 mm/s

Scanner resolution: 1354 steps/mm

Raster arm resolution: 240.2 steps/mm

Power consumption: 96 W

Maximum input current: 1.4 A

Voltage: 15–48 VDC

Power supply input voltage:
100 VAC to 240 VAC; autoswitching

Component	Length (mm)	Width (mm)	Height (mm)	Weight (kg)
Scanner with raster arm (no skew bar, on 12 in. pipe OD)	450	726	160	10.9
Scanner with raster arm (minimal configuration, on 12 in. pipe OD)	295	726	104	10

Manual Two-Axis Scanner

ChainSCANNER - Pipe Inspection

The ChainSCANNER is the most versatile two-encoded axes manual pipe-inspection solution for a pipe range with outside diameters from 1.75 in. to 38 in. (45 mm to 965 mm). The scanner, which is held by chain links instead of magnetic wheels, is capable of inspecting ferromagnetic or non-ferromagnetic surfaces. The chain links help to ensure a straight displacement of the scanner by eliminating steering problems. It is also very useful when the area around the pipe is not entirely accessible, as the scanner can be rotated by pulling on the chain links.

Main applications

- Circumferential-pipe weld inspections with phased array, TOFD, or conventional UT (picture above).
- Corrosion mapping in conjunction with HydroFORM phased array solution (picture below).

Features

- Standard configuration using one or two probes, and optional configuration using four probes for TOFD, phased array, or pulse-echo inspections.
- A pipe range with outside diameters from 1.75 in. to 38 in. (45 mm to 965 mm).
- An encoded manual scan with up to two axes.
- Ergonomic handle to protect encoder connectors and provide cable management.
- Independent chain links which are mounted on bearing wheels coated with urethane for smooth rolling.
- An easy clamping device for quick scanner positioning.
- Spring-loaded probe holders that ensure good probe contact in any scanner position or orientation.
- The majority of adjustments can be made without the use of tools.

Standard Inclusions

- Main module with a scan-axis encoder.
- Encoded probe-positioning system with lead screw adjustment.
- Chain links for up to 38 in. pipe ODs, with a quick-release adjustable buckle.
- One 5 m encoder cable.
- One 450 mm (17.7 in.) probe-holder bar.
- Two spring-loaded probe holders with two adjustable PA yokes.
- Two adjustable TOFD-P/E yokes.
- One 5 m divisible cable conduit (19 mm ID).
- Cable conduit attachment fixture.
- Irrigation tubes and fittings.
- A ChainSCANNER custom tool.
- A carrying case.

Note: probes and wedges are not included with the scanner.

Main Module Specifications

Length in Scan Axis (mm)	Width (mm)	Height (mm)	Weight (kg)
114	75	84	1

Encoder resolution:

Circumferential (X) axis: 19.2 steps/mm.

Longitudinal (Y) axis: 226.8 steps/mm.

Options

Remote Pulser/Preamplifier

See the accessories section on page 24.

Couplant-Feed Units

See the accessories section on page 29.

Arm Stabilizer

ChainSCANNER arm stabilizer kit. Includes a magnetic wheel block and the holder.

P/N: ChainScan-A-Stabilizer [U8775210]

Chain Links

Extra ChainSCANNER short link. Required on pipe ODs less than 9.6 in.

P/N: ChainScan-A-SLink [U8775127]

Extra ChainSCANNER long link. To be used on pipe ODs greater than 9.6 in.

P/N: ChainScan-A-LgLink [U8750042]

Encoded probe-positioning system with lead screw adjustment.

Additional Packages

Two Additional Probe Packages

Needed to perform inspections with four probes and a preamplifier on the ChainSCANNER.

P/N: ChainScan-A-4Probe [U8775128]

Mouse Package

Needed to use the ChainSCANNER as a mouse scanner with magnetic wheels holding the system instead of chain links.

P/N: ChainScan-A-Mouse [U8750037]

Short Bar Package

A 20 cm probe-holder bar and lead screw kit for restricted space applications.

P/N: ChainScan-A-SBar [U8775129]

Ordering information

Part Number	Item Number	Description
ChainScan-XY38	U8750041	ChainSCANNER for 45 mm to 965 mm (1.75 in. to 38 in.) OD pipes with two encoded axes.
ChainScan-SP-Basic	U8779370	Basic spare part kit for the ChainSCANNER which includes: lead screw and lever for buckle, wedge pivot buttons, dovetail nuts, tool, plastic wheel, and screws.

MapSCANNER – Corrosion Mapping

The MapSCANNER is an innovative new manual scanner specifically designed for corrosion mapping inspections. With its wide scanning capability and quick indexing system, the MapSCANNER is the ideal scanner for high-production, phased array, semi-automated corrosion mapping inspections. The MapSCANNER can be purchased with chain links or as an upgrade for the ChainSCANNER thanks to its compatibility with the chain links you may already own. The scanner can also be configured with magnetic wheels to inspect ferromagnetic parts where chain links are not required. When combined with the HydroFORM or dual linear array probe (DLA) corrosion mapping solutions, the MapSCANNER is a very powerful tool to efficiently perform C-scan imaging of remaining wall thickness and mid wall anomalies.

Part number	Item Number	Description
MapSCANNER-ADPCHAIN	Q7500004	Manual scanner package upgrade from ChainSCANNER (without chain links and encoder cable)
MapSCANNER-LINKS	Q7500005	Complete manual scanner package including chain links
MapSCANNER-MAG	Q7500006	Complete manual scanner package with magnetic wheels
HydroFORM-K-SAUT	Q7500007	HydroFORM water box with 7.5 m long cable PA probe
MapSCANNER-A-MAG	Q7750071	Conversion kit to convert a MapSCANNER compatible with chain links to a magnetic version
MapSCANNER-SP-Basic	Q7750090	Basic spare part kit

Features

- Two axis encoded scan.
- Quick indexing system with adjustable keys.
- Pass-through frame arch principle for greater scanning width.
- Stabilizer wheels at both ends of the frame bar.
- Brake system.
- Optional chain links which are mounted on bearing wheels coated with urethane for smooth rolling.
- A pipe range with outside diameters from 4 in. to 38 in. (102 mm to 965 mm) for model using chain links.
- A pipe range with outside diameters from 4 in. to flat (102 mm to flat) for model using magnetic wheels.
- Spring-loaded probe holders that ensure good probe contact in any scanner position or orientation.

Standard Inclusions

- Adjustable spring loaded probe holder.
- HydroFORM water box-specific cart with wheels.
- 7.5 m encoder cable for OmniScan MX2 and SX with zipper type cable protection sleeve (not included in MapSCANNER-ADPCHAIN).
- Frame bar good for 580 mm wide inspection.
- A carrying case.

A version of the MapSCANNER is also for use on ferromagnetic surfaces of 4 in. OD to flat.

GLIDER – Composites Inspection

Photo used with the permission of Avior, Produits Intégrés

The GLIDER™ X-Y scanner is a two-axis encoding scanner for manual inspection of slightly curved or flat composite surfaces.

Commonly inspected materials include composites and aluminum using suction-cup pods and carbon steel using optional magnetic pods.

Applications

- Inspection of composites.
- Inspection of airplane fuselages for delamination and cracking.
- Inspection of ferromagnetic plates for corrosion.
- Inspection of friction stir welds (FSW) on aluminum.

Options

Magnetic accessories package

Magnetic mounting pods and Y-axis support enable use on ferromagnetic surfaces.

P/N: GLIDER-A-01 [U8775058]

Yokes

See the accessories section on page 30.

Couplant-Feed Units

See the accessories section on page 29.

Interchangeable mounting pods (magnetic pods are optional).

Features

- Well-suited to phased array, conventional UT, and eddy current inspection techniques using one probe.
- Two axes with waterproof encoders for position-encoded X-Y scans.
- Axis positioning with minimal backlash.
- Both modules are mounted on bearings for precise and smooth displacement.
- Two pivot-equipped mounting pods enable surface following.
- Locking devices for each axis.
- Module displacement can be in increments of 3.27 mm, or in free-running mode.
- The probe holder is mounted on a bearing-arm system that can be spring loaded if needed.
- An aluminum frame is used for lightweight and rust-free components.
- The Y axis can be easily shortened for smaller surface radius inspection or removed for easier transport.

Standard Inclusions

- Two tracks (18 in., 24 in., or 36 in., depending on the model).
- Two displacement-encoding modules.
- Two suction-cup mounting pods.
- Two encoders with a 5 m cable.
- One PA 40 mm x 55 mm yoke.
- One TOFD-P/E 31.75 mm yoke.
- 90° probe holder mounting bracket.
- 180° probe holder mounting bracket.
- 45°, 90°, 180° adjustable probe holder mounting bracket.
- Probe holder bearing arm with spring.
- Irrigation tubing and fitting.
- A carrying case.

Note: the umbilical cable, probes, and wedges are not included with the scanner.

Specifications

Weight: 5 kg to 8 kg, depending on the configuration

Suction-cup pod holding force: 7 kg per cup

Magnetic-pod holding force: 81 kg per base

Encoder resolution: 13 steps/mm (± 0.15 step/mm), 330 steps/in. (± 0.006 step/in.)

Minimum curvature for partial scans: 50 cm (20 in.) OD

Ordering Information

Part Number	Item Number	Description	Length (X) (mm)	Width (Y) (mm)	Height (mm)

Pulsers and Preamplifiers

TRPP 5810 – Pulsar/Preamplifier for TOFD Inspection

The TRPP 5810™ unit is a high-performance remote pulser/preamplifier dedicated to TOFD inspections and compatible with the Olympus scanner line.

This remote pulser/preamplifier provides an optimum signal-to-noise ratio for TOFD inspections by combining a 40 dB preamplifier with a remote high-voltage (200 V) pulse repeater in a single, small enclosure. The TRPP 5810 supports two UT channels, which enables simultaneous inspection with one or two pairs of TOFD probes. The TRPP 5810 can be used as a pulser and/or preamplifier.

TRPP 5810 as a Pulsar

- Provides an additional pulse gain to generate a stronger signal, as needed in order to reveal difficult-to-detect flaws.

TRPP 5810 as a Preamplifier

- Provides the additional gain or broadband signal-to-noise enhancement necessary for optimum signal acquisition on thick sections of material exhibiting high ultrasonic attenuation.
- Allows long cables to be driven from remotely located sensors.

Features

- Dimensions (W × H × L): 57 mm × 32 mm × 90 mm.
- Weight: 300 g.
- UT connectors: 8 × LEMO 00 female.
- Water/moisture resistance: NEMA 4-IP66. Rustproof.
- Powered by an external 12 VDC source, or from the instrument.
- Power connector: Compatible with standard Olympus umbilical cables (male Fisher 103 type).
- A red power-on LED indicator.
- Operating temperature range: -10°C to 60°C.

Specifications

Pulsar

- A remote, high-voltage (200 V) pulse repeater.
- PRF of up to 10 kHz at 100 ns per channel, and up to 20 kHz at 50 ns for a single channel.
- Pulsar-side outputs which protect against misuse and improper connection from the instrument outputs.

Preamplifier (Receiver)

- 40 dB preamplifier.
- Accommodates probe frequency ranges from 1 MHz to 15 MHz.
- Preamplifier side inputs and outputs are protected against misuse and improper connection from the instrument outputs.

Options

Power Cable

(from TomoScan FOCUS LT)

One 5 m power supply cable linking to the TomoScan FOCUS LT™.

P/N: TRPP-5810-A-01 [U8800488]

Power Cable (from OmniScan)

10 m power supply cable linking to the OmniScan®.

P/N: TRPP-A-PWRC-OM-10M [U8775118]

Transformer and Cable

Transformer (120 VAC to 240 VAC input to 12 VDC output) with a 10 m power supply cable.

P/N: TRPP-A-PWRC-AC-10M [U8779168]

Ordering Information

Part Number	Item Number	Package Contents
TRPP-5810	U8120042	Pulsar/Preamplifier, one 5 m power supply cable (120 VAC to 240 VAC input to 12 VDC output), and one 5 m power supply cable linking to an OmniScan®, and carrying case.
TRPP-5810-KIT01	U8120043	Same as P/N TRPP-5810, plus: Four 0.6 m UT probe cables (LEMO 00 to Microdot), and brackets to attach the TRPP 5810 to HSMT-type scanner. (P/N: HSMT-A-BRK5810 [U8779088])
TRPP-5810-INST	U8775114	Same as P/N TRPP-5810-KIT01, plus: Four 5 m UT cables (LEMO 00 to LEMO 00) linking the TRPP 5810 to the instrument.
TRPP-5810-UMB	U8775113	Same as P/N TRPP-5810-KIT01, plus: Four 0.6 m UT cables (LEMO 00 to LEMO 00) linking the TRPP 5810 to the umbilical.

5682 – Preamplifier for TOFD Inspection

The 5682 ultrasonic preamplifier provides low-noise amplification of ultrasonic signals (for one probe) ranging from 500 kHz to 25 MHz. The preamplifier, which is housed in a rugged splashproof enclosure, is very small and lightweight, making it ideally suited to remote applications. The preamplifier can be powered with either a single 9 V battery (included) for up to 50 hours of continuous operation, or an optional 9 V to 13 V DC supply. When battery operated, a multicolored LED provides battery feedback status. This preamplifier is ideal for TOFD inspections.

Specifications

- 30 dB gain
- 50 hours of battery life (continuous discharge)
- A continuous power-level indicator
- 67 dB signal-to-noise ratio
- Weight: 180 g with battery

5682-KIT01

Ordering Information

Part Number	Item Number	Package Contents
5682	U8120006	5682 preamplifier and 9 V battery
5682-KIT01	U8120038	5682 preamplifier, one 2.5 m UT probe cable (LEMO 00 to LEMO 00), one 2.5 m power supply cable linking to the OmniScan [®] and a belt case.
5682-KIT02	U8779091	5682 preamplifier, one 5 m UT probe cable (LEMO 00 to LEMO 00), one 5 m UT probe cable (LEMO 00 to Microdot), one 0.6 m UT probe cable (LEMO 00 to Microdot), one 5 m power supply cable linking to the OmniScan [®] , a belt case, and a bracket to attach the 5682 to HSMT-type scanners, HST-Lite, or ChainSCANNER (P/N: HSMT-A-BRK5682 [U8779089]).
5682-A-PWRC-OM-5M	U8775119	One 5 m power supply cable linking to the OmniScan.
5682-A-PWRC-UMB-0.15M	U8779092	Power cable adaptor linking the 5682 preamplifier to the umbilical cable.

PR-06-04 – Pulser/Preamplifier for Pulse-Echo Inspection

The PR-06-04 is a four-channel pulser/preamplifier for pulse-echo. Each channel can drive a conventional UT probe for a higher gain pulse and boost the return signal, thereby improving detection and signal-to-noise ratio. The PR-06-04 can also be used as a pulser or a receiver only.

Specifications

Pulser

- –45 V to –220 V input level (min-max)
- –160 V to –190 V output amplitude (pulser at 100 ns)
- 4 ns to 10 ns rise time and fall time

Receiver

- 40 dB gain
- 8 dBm to 12 dBm input level (max.)
- 8 dBm to 12 dBm output level operation
- 550 kHz to 30 MHz bandwidth at –3 dB

Ordering Information

Part Number	Item Number	Package Contents
PR-06-04	U8750028	PR-06-04 pulser/preamplifier
OPTX667	U8775012	PR-06-04 pulser/preamplifier, four 0.6 m UT probe cables (LEMO 00 to 90° Microdot), and a bracket to attach the unit to an HSMT-type scanner. (P/N: HSMT-A-BRKEX [U8779090]).

Note: These packages have been created to be used with an umbilical cable with an integrated power cable. If no such umbilical is used, an optional power cable must be ordered.

Due to power requirements, the PR-06-04 cannot be connected to the OmniScan power output.

Options

Transformer and Cable

Transformer (120 VAC to 240 VAC input to 12 VDC output) with a 5 m power supply cable. P/N: TRPP-5810-A-03 [U8800490]

Transformer (120 VAC to 240 VAC input to 12 VDC output) with a 10 m power supply cable. P/N: TRPP-A-PWRC-AC-10M [U8779168]

Cables and Adaptors

Umbilical Cables

Umbilical cables are used to make all the connections between the scanner and the acquisition unit. They can be of two types:

- Closed umbilical
- Divisible conduit

Closed umbilical

The closed-type umbilical offers the best rugged protection. It covers the cable with a resistant, waterproof, and dust proof conduit. It is also always fitted with a safety hook on both ends and comes in different models according to the applications and scanners with which it is intended to be used. The configuration of the cables is fixed and cannot be changed afterwards.

Ordering information for Umbilical cables

UMB-UTPA0202-10-RO

Umbilical cable type

UT and PA cables

Cable length

Power cable

Umbilical cable type

UMB1 = Umbilical for HSMT scanners.

UT and PA cable

UT = RG174 coaxial cables for conventional UT probes.

PA0000 = 128-element OmniScan PA probe extension.

PA0202 = 124-element OmniScan PA probe extension with 4 LEMO 00 at pin 63–64 and 127–128.

IBTx = 128-element Interbox with two OmniScan PA probe connectors, TRPP 5810™, and x (0, 4, or 8) extra UT channels.

IBx = 128-element Interbox with two OmniScan PA probe connectors and x (0, 4, or 8) UT channels.

64IBTx = 64-element Interbox with two OmniScan PA probe connectors, TRPP 5810™, and x (0, 4, or 8) extra UT channels.

64IBx = 64-element Interbox with two OmniScan PA probe connectors, and x (0, 4, or 8) UT channels.

Cable length in meter*

5 = 5 m

10 = 10 m

Power cable

RO = Remote pulser/receiver or Interbox power cable linking to OmniScan® or AC-using adaptor.

*Can be customized, common values shown. Note that, under certain circumstances, the use of longer phased array cables can lead to signal degradation due to attenuation and/or crosstalk.

Divisible conduit

The divisible type is composed of two split shells that completely protect the cables. Even though it is not as rugged as the closed-type umbilical, it offers other advantages. Because the cables can be changed inside at any time, there is no need for connection boxes, which are often needed for PA probes on the scanners. The probes must have the proper cable length to reach the acquisition unit.

Ordering information

Part Number	Item Number	Description
60BA5028	U8779093	One 0.3 m divisible cable conduit with a 16 mm ID. Well-suited to 2 × PA, irrigation tube, and the encoder cable.
60BA0109	U8779094	One 0.3 m divisible cable conduit with a 19.2 mm ID. Well-suited to 2 × PA, 2 × conventional UT, irrigation tube, and the encoder cable. Standard equipment of HydroFORM™ scanner.
60BA0131	U8775093	One 0.3 m divisible cable conduit with a 24.2 mm ID. Well-suited to 2 × PA, 4 × conventional UT, irrigation tube, encoder, and preamplifier power supply cables.
OPTX0719	U8779095	One 5 m divisible cable conduit with 24.2 mm ID. Well-suited to 2 × PA, 4 × conventional UT, irrigation tube, encoder, and preamplifier power supply cables. Standard equipment of WeldROVER™ scanner.

Adaptors and Extension Cables

Part Number	Item Number		Description
ADAPTORS			
OMNI-A2-ADP03	U8775202		Adaptor for Hypertronics PA probe to instrument with an OmniScan connector. Compatible with OmniScan MX2, OmniScan MX, and OmniScan SX.
OMNI-A-ADP05*	U8767016		Y adaptor with OmniScan connectors to support two PA probes with a maximum of 64 elements each. Compatible with OmniScan MX. Connector layout: one female output and two male inputs.
OMNI-A2-SPLIT64	U8100135		Y-adaptor (splitter) with OmniScan connectors to support 2 phased array probes. Compatible with OmniScan MX2 with PA2 modules. Part number details SPLIT64: Compatible with 64 elements PA2 modules SPLIT128: Compatible with 128 elements PA2 modules 4UT: Features four Lemo-00 UT connectors
OMNI-A2-SPLIT64-4UT	U8100136		
OMNI-A2-SPLIT128	U8100133		
OMNI-A2-SPLIT128-4UT	U8100134		
OMNI-A-ADP11*	U8767019		Adaptor with LEMO 00 connectors. Enables the use of up to 8 conventional UT probes with an OmniScan MX PA instrument.
OMNI-A-ADP12	U8767020		Adaptor with LEMO 00 connectors. Enables the use of up to 16 conventional UT probes with an OmniScan PA instrument. Supplied with a 1 m cable.

*These adaptors cannot be connected directly to the OmniScan MX2. To make the connection, a PA extension cable is needed (E128P type, shown on table below).

PHASED ARRAY EXTENSION CABLES (COMMON MODELS)

E128P0-0202-OM	U8800635		An extension cable with an OmniScan connector at both ends. Can be fitted with 4 LEMO 00 connectors enabling the simultaneous use of conventional UT and PA probes with a PA instrument. Option: A bracket for mounting the OmniScan PA extension on HSMT scanners. P/N: HSMT-A-BRKEX [U8779090]
E128P5-0004-OM	U8800441		
E128P5-0202-OM	U8800442		
E128P10-0004-OM	U8800431		
E128P10-0202-OM	U8800432		

Combining extension cables with adaptors offers numerous connection possibilities.

Interbox

The Interbox is an ergonomic solution for a common problem associated with scanner accessories and connection buildup. This compact hub can connect two phased array probes and two amplified TOFD channels in addition to eight conventional UT channels driven by a phased array acquisition unit. The Interbox can integrate a PA splitter, a TRPP 5810 TOFD pulser/preamplifier, and up to eight extra conventional UT connections, depending on the configuration.

Indexer Clicker

Clicker-scanner

5 m long cable, laser guide, and a scanner mounting bracket compatible with HSMT scanners
P/N: Q7500012

Using an indexer clicker is an economical way to create a C-scan with a one axis scanner. The indexer clicker is offered in two different models optimized for either manual or semi-automated inspection.

Both models feature:

- Ergonomic handle
- LEMO 16-pin encoder input
- Indexing button
- Configurable digital input (DIN) button
- Encoder cable with LEMO 16-pin connector compatible with OmniScan MX2 or SX

Clicker-manual

2.5 m cable for manual operation
P/N: Q7500011

Couplant-Feed Units

CFU03 and CFU05 – Electric Couplant-Feed Units

CFU05

CFU03

The CFU03 and CFU05 are portable electric-pump units used to supply couplant to wedges during ultrasonic inspections. Both units are equipped with a diaphragm pump equipped with a bypass to ensure a constant flow and avoid any pump priming issues. The pump units are also equipped with a valve to control the outlet flow. The CFU05 features water-suction capabilities to reduce water loss when used with certain water delay line wedges.

CFU03 Features

- A diaphragm pump with a flow of 3.78 l/min (1 GPM) at 60 psi.
- An internal bypass which ensures that the pump is always primed.
- Operates on 100 VAC and 240 VAC.
- Start/Stop button.
- An outlet flow control valve.
- A pump inlet tube equipped with a filter and check valve to ensure that the tube is always filled.
- Inlet and outlet quick-connect fittings.
- A rugged plastic case.
- CE certified.

CFU05 Features

The CFU05 has the same features as the CFU03, plus:

- Water suction generated by a Venturi system using an external compressed-air supply.

Standard Inclusions

- 3.3 m (10 ft), 9.5 mm (3/8 in.) ID tube for pump inlet with filter and check valve.
- 3.3 m (10 ft), 9.5 mm (3/8 in.) ID tube for vacuum outlet (CFU05 only).
- 3.3 m (10 ft), 5 mm (3/16 in.) ID tube and Y adaptor for pump outlet.
- 3.3 m (10 ft), 5 mm (3/16 in.) ID tube and Y adaptor for vacuum inlet (CFU05 only).
- Power supply, 100 VAC to 240 VAC input to 24 VDC output.

WTR-SPRAYER-8L

Manual Couplant-Feed Units

The manual-pump unit offers an affordable and efficient way to supply couplant to wedges during automated inspections.

Features

- Reservoir capacity of 4 L or 8 L
- Flow valve
- Supplied tubes: 8 mm OD and 5 mm ID
- Sling for easy transport

Aqualene Elastomer Couplant

Aqualene™ is an elastomer designed specifically for ultrasonic inspection applications. Acoustic impedance of the material is nearly the same as water, and its attenuation coefficient is lower than many documented elastomers and plastics. Applications for nondestructive testing include:

- Flexible couplant pads with minimal water addition.
- Low-velocity delay lines.
- Water-box membrane.

Aqualene elastomer couplant reduces the drawbacks of wet coupling when used on porous or refractory surfaces. It allows a minimal amount of couplant to be used while protecting the probe when in direct contact with the part. Furthermore, Aqualene can serve as a thermic insulator. Aqualene couplant products are available in many sizes and thicknesses.

Training

Olympus has worked in partnership with major training companies to develop its unique Training Academy, in an effort to offer comprehensive courses in phased array technology and applications. Courses range from a two-day "Introduction to Phased Array" program to an in-depth, two-week "Level II Phased Array" course. In both cases, students experience practical training utilizing the portable OmniScan® phased array flaw detector. Courses lead to either recognized certification or certificates of attendance.

Courses are currently being offered at the training facilities of participating companies and at customer-determined locations worldwide. Customized courses can also be arranged. Check the latest course schedule in the "Support" section at www.olympus-ims.com.
